

What's going on in Western New York?

A New York State Department of Health Reform Initiative “Cheat Sheet” to Achieving the Triple Aim:
Better Health, Better Care, and Lower Costs

A critical role of the P² Collaborative as the Population Health Improvement Plan (PHIP) organization in WNY will be to coordinate regional activities to improve population health, including those which advance the goals of the New York State Prevention Agenda, State Health Improvement Plan, and Delivery System Reform Incentive Payment project implementation.

<i>Name of Program</i>	<i>What are the program goals? How will they be achieved?</i>	<i>Who is involved?</i>	<i>What is the role of PHIP?</i>
New York State Prevention Agenda 2013-2017	<p>The Prevention Agenda is NYS’s plan to improve population health by 2017. It is a guide which provides indicators, goals, and evidence-based intervention suggestions centered around five priority areas:</p> <ul style="list-style-type: none"> • Chronic Disease; Mental, Emotional, and Behavioral Health; Healthy Women, Infants, and Children; Environmental Health; and STDs, Vaccine-Preventable Diseases, and Hospital-Acquired Infections 	Collaboration is encouraged across local health departments, hospitals, health plans, community-based organizations, advocacy groups, academia, employers, state agencies, schools, and businesses.	PHIP will coordinate and support entities engaged in Prevention Agenda-related work, with particular focus on support of evidence-based intervention implementation.
New York State Health Improvement Plan (SHIP)	<p>SHIP’s purpose is to improve access to best-practice primary care for all residents, without disparity, over the next 5 years. Major goals:</p> <ul style="list-style-type: none"> • 80% of the state’s population will receive “Advanced Primary Care” (APC), focused on population health and behavioral health integration • 80% of this care will be paid for by value, not volume • More transparent cost and quality information will enable greater consumer engagement in care 	Primary care providers, payers, and practice transformation organizations will work together to reform care delivery and payment; workforce development and health information technology (IT) strategies will also be implemented.	PHIP will: provide health disparities data and training; support regional APC adoption; inform a regional workforce development strategy; facilitate broader health IT adoption; and monitor SHIP impact on population health.
New York State Delivery System Reform Incentive Payment (DSRIP) program	<p>DSRIP's purpose is to fundamentally restructure the health care delivery system by reinvesting in the Medicaid program, with the primary goal of reducing avoidable hospital use by 25% over 5 years. Up to \$6.42 billion dollars are allocated to this program with payouts based upon achieving predefined results in system transformation, clinical management, and population health.</p>	Performing Provider Systems (PPS): Coalitions of safety-net healthcare providers, also tasked with building linkages to community-based organizations which impact the social determinants of health.	PHIP will serve to inform community stakeholders of ongoing DSRIP activities and will be available to assist with DSRIP project plan implementation upon request.
